

Manufacturing Technician

PhotoniCare – Champaign IL

PhotoniCare, Inc. (www.photoni.care) is a medical device manufacturer located in Champaign, IL. We have developed a device called the TOMi Scope, which uses light to image the middle ear space, allowing health care providers to make more informed decisions about treating ear infections. This device was recently cleared by the FDA and we are building out our manufacturing capabilities to produce these devices at our manufacturing facility.

We're looking for a technician who can build and test the devices and help increase manufacturing efficiency. The ideal candidate is excited to work in the fast-paced environment of a startup, cares about producing high quality work, and is interested in improving manufacturing processes.

The role would be a full-time contract position initially, with potential for moving to a permanent position after a successful 90-day evaluation period. If a part time position is preferred during the evaluation period, that can be negotiated.

Responsibilities:

- Assembling medical devices
- Testing device functionality
- Writing work instructions for processes
- Inspecting material
- Using quality control and enterprise resource planning software

Required qualifications:

- Excellent attention to detail
- Good written communication skills
- Basic assembly skills

Additional skills which are benefits but not required:

- Prior experience in manufacturing
- Familiarity with measuring equipment such as height gauge, micrometer, and calipers
- Quality experience or experience working in a regulated environment
- Knowledge of optics, electrical engineering, or industrial engineering
- CAD experience

To apply, please send a resume and cover letter to Heather Howard at howard@photoni.care
